

ALL PROJECT LIST

01

Multi-Tier Full-Stack Node.js Application Deployed on AWS Using 20+ Services with High Availability, Scalability, Networking, Security, and Monitoring.

02

Cloud Deployment of a Scalable, Resilient Full-Stack Python Application on AWS EC2 with Disaster Recovery Strategy.

03

Cloud-Native Deployment of a Full-Stack Java Spring Boot Application on Azure with High Availability and Disaster Recovery Strategy

04

Cloud-Native Deployment of a Full-Stack Nodejs Application on GCP with High Availability, Scalability, Networking, Security.

05

Automated Database Migration from EC2-Hosted MySQL to Amazon RDS Using AWS Database Migration Service (DMS) with Minimal Downtime and High Availability

06

End-to-End Application Migration from On-Premises Infrastructure to AWS Cloud with High Availability, Scalability, and Security Best Practices

07

Optimized Static Web Hosting Architecture on AWS S3 with CDN and Custom Domain.

08

Implementing Automated Backup Strategies in AWS Cloud Using Serverless Lambda Functions

09

End-to-End CDN Optimization: Configuring CloudFront for Low Latency and Automating Cache Invalidation Using Lambda

10

Cloud-Native Full-Stack Application Deployment on AWS ECS Fargate with CI/CD, Auto Scaling, and Secure Networking

11

Unified Infrastructure Monitoring with Prometheus and Grafana: Centralized Dashboard for Multi-Server Observability

12

Centralized Logging with Amazon CloudWatch and Cost-Optimized Log Archival to S3 Using AWS Lambda serverless

13

End-to-End Automation of Multi-Tier AWS, Azure and GCP Cloud Infrastructure Using Terraform with Complete Networking, Security, and Deployment Layers

14

End-to-End Automation of Java Maven Application Deployment on Apache Tomcat Using CI/CD Practices

15

End-to-End Cloud-Native CI/CD Pipeline for Node.js Microservices with Jenkins and Kubernetes

16

End-to-End DevOps Automation for Node.js Microservices with GitLab CI/CD and Kubernetes (EKS)(Elastic Kubernetes Service)

17

End-to-End CI/CD Pipeline for Java Applications Using Azure DevOps, Docker, and Kubernetes AKS(Azure Kubernetes Service)

18

End-to-End CI/CD Pipeline (Gitlab CICD) for Java Applications Using Azure DevOps, Docker, and Kubernetes GKE(Google Kubernetes Service)

19

Full-Stack Microservices Application (python, java and nodejs) Deployment on AWS Using CI/CD, GitOps, Helm, and Centralized Monitoring with Prometheus, Grafana, and the EFK Stack

20

End-to-End Production-Grade EKS Cluster Deployment on AWS, Azure and GCP Using Terraform with High Availability, Scalability, and Secure Networking

21

Fully Managed Serverless Full-Stack Deployment Using AWS Services (Lambda, API Gateway, DynamoDB)

22

End-to-End Patch Management and Monitoring Configuration Using Ansible

23

Containerized Full-Stack Application Deployment Using Docker & Docker Compose

24

Centralized Application Log Monitoring and Visualization on Amazon EKS Using the ELK Stack (Elasticsearch, Logstash, Kibana) for Enhanced Observability
